Portable Hand Held Droppers

C2XG 1 Pint Dropper

Sta-Warm portable alloy droppers are used for applying small amounts of material directly to the work, through the thumb-controlled needle valve. Available in 2 and 4 pint size with inner cup of mild or stainless steel. Special low wattage and variable temperature controllers are furnished for temperatures ranging from 100-550°F. Voltage 120/240 volt AC 60 or 50 cycle.

- Portable and easy to use
- Fast, efficient dispensing
- Thumb controlled needle valve
- Stand for holding when not in use
- "Even Heat" distribution
- Single heat or multiple step rheostat
- Single phase, 120 or 240 volt
- Special construction if required
- Complete with cord and plug
